Generate **Soft-UI** CSS code

The screenshot displays the Neumorphism.io website, which is a tool for generating soft UI CSS code. The interface features a central preview area showing a soft UI design element, a settings panel on the right with sliders for Size, Radius, Distance, Intensity, and Blur, and a color picker. The generated CSS code is visible in a dark box, and a 'Copy' button is provided. The website also includes a 'Star on GitHub' button, a 'Read more about Neumorphism' link, and a footer with an 'Authentic' logo and a 'Check out uiverse.io' link.

Neumorphism.io
Generate Soft-UI CSS code

Pick a color: or

Size:

Radius:

Distance:

Intensity:

Blur:

Shape: ☐ ☐ ☐ ☐

```
border-radius: 50px;  
background: #e0e0e0;  
box-shadow: 20px 20px 0px #e0e0e0,  
            -20px -20px 0px #ffffff;
```
